Zoom discussion Saturday, July 15th 4:00 pm Eastern US
(Sunday, July 16th 6:00 am Melbourne Australia)

The goal with this challenge is to make a spoon that fits a case that you already have. The challenge at a minimum is an eating spoon that uses as much of the interior volume of whatever size case you can find.

The design shown is a "pocket spoon" that fits in a hard glasses protective cases, (aka spectacles or eyeglasses depending on where you live).

The internal dimensions of the case is 150mm x 65mm x 30mm with a velvet lining about 1mm thick. The spoon is 145mm long x 48mm wide and 30mm high, with the bowl being 70mm from the tip to the neck junction with the handle.
